

LIBRARY RECOMMENDATION FORM

To _____

(name of librarian or departmental library representative)

This is a **RECOMMENDATION** for our library to subscribe to the Mary Ann Liebert, Inc. titles

TISSUE ENGINEERING, Part A ISSN 1076-3279
TISSUE ENGINEERING, Part B, Reviews ISSN 1937-3368
TISSUE ENGINEERING, Part C, Methods ISSN 1937-3384

Please include this journal title in the next serials review meeting with my recommendation. Thank you!

(name, department, & title of person recommending the journal for the library collection)

The major USES of this title for our Library would be:

- **RESEARCH:** I am a member of the journal's sponsoring society, Tissue Engineering and Regenerative Medicine International Society (TERMIS), and need to have my colleagues, research associates, and assistants have access to this journal's research papers as part of on-going research projects in this important, emerging field.
- **PREDICTED BENEFIT FOR LIBRARY:** My evaluation of this journal's content and scope is very high, and it has a citation factor of **3.725** (2006 Journal of Citation Reports®, Thomson). Adding this authoritative journal to our collection will successfully support the library's ongoing goal of fulfilling the information needs of our institution.
- **PUBLICATION OUTLET:** My current research requires a publications outlet in this exact area. I need this journal to keep up to date with its editorial direction and scope.
- **ONLINE VERSION,** available as a site license with IP address validation, is fully searchable and contains active reference links to major external bibliographic resources on the web such as PubMed/MEDLINE, as well as cross-publisher, cross-title linking of citations via the CrossRef system. A subscription includes access to Volume 1, Issue 1, a critical mass of content.
