Postdoctoral Positions

NovaSterilis Incorporated is a rapidly growing, business located in Central New York near Cornell University.

NovaSterilis is leading the way in improving the safety of the nations musculoskeletal human tissue supply. We currently have 1 Postdoctoral Position.

A postdoctoral position is available to study the efficacy of our patented CO2 sterilization process and its subsequent effects on donor musculoskeletal tissue. There is additional opportunity to manage the development of additional applications for our technology. This position is available immediately and applications will be accepted until the position is filled. Salary will be commensurate with experience. Applicants should have a PhD and significant experience with biological and microbiology techniques, virology, and biomechanical testing. Successful candidates must have management experience and driven to complete and succeed in project goals.

Please send a letter of interest and resume to:
