The London Project to Cure Blindness at 10 years, have we found a cure?

Pete Coffey
UCL Institute of Ophthalmology, London, United Kingdom

The London Project to Cure Blindness is a collaboration between Professor Pete Coffey and Dr Lyndon da Cruz from University College London and Moorfields Eye Hospital. The project aims to use Stem Cell technology to restore sight, prevent progression and ultimately improve the quality of life for patients with Age–Related Macular Degeneration (AMD) and other retinal and macular disorders, combining cutting edge knowledge and technology from the laboratory, clinic and operating theatre.
